THE CAUSE

A night to accelerate a cure for childhood blindness

"Imagine growing up without sound, without balance and without sight."

Save Sight Now Europe is the only organisation in Europe dedicated exclusively to Usher syndrome type 1B: a rare disease that takes away children's hearing, balance and sight from birth. No treatment can stop it.

We know that, with the support of our scientific community, we can prevent, reverse, and even cure this form of blindness. To make that possible, research must never stop.

Every November, La Nit de la Visió brings companies, families and scientists together in the same room to make it possible: raising awareness, building community and generating funds for research.

Unique in Europe

No other organisation focuses all its efforts exclusively on Usher syndrome type 1B.

Scientific rigour

Every project we fund is reviewed with the guidance of our Scientific Advisory Committee.

4th edition

A growing movement

Every November, we come together to raise awareness of a cause that is still invisible to many. In this 4th edition, we reaffirm the strength of a growing movement: companies, scientists, families and supporters united to transform the future of thousands of children.

See what La Nit de la Visió 2025 was like

CHILDHOOD BLINDNESS

What is Usher syndrome?

It is the leading genetic cause of deafblindness worldwide: an autosomal recessive disorder present from birth that combines hearing loss, balance problems and progressive retinitis pigmentosa, the most common inherited cause of blindness.

Three types are distinguished according to severity. Type 1, the most severe —and, in our focus, subtype 1B caused by mutations in the MYO7A gene— **causes profound congenital deafness, severe balance problems from birth and the onset of vision loss during childhood.**

Retinal degeneration progresses silently: it begins with loss of night and peripheral vision (“tunnel vision”) and gradually affects central and colour vision. Today, there is still no treatment capable of stopping it.

PROJECTS AND PARTNERSHIPS WE DRIVE

Cutting-edge research

Institut ReConnect (Institut Pasteur)

The ReConnect project is exploring a dual-vector therapeutic approach.

Programa RetinAi + Institut Vision

“Longitudinal outer-retinal thinning in MYO7A- and USH2A-related retinal degeneration: a genotype-stratified OCT natural-history study” Scientific paper reporting the programme’s first results.

Hospital del Mar ASO Therapy

A preliminary-stage project assessing the potential of antisense oligonucleotides (ASOs) as a therapeutic approach to slow retinal degeneration.

Industry partnerships

Under confidentiality agreements, we are developing joint projects with several leading Catalan biotechnology companies. We will share further details as soon as the agreements allow us to do so.

SPONSORSHIP OPPORTUNITIES

Choose how you want to support us

All funds raised are allocated to biomedical research projects, with the guidance of our Scientific Advisory Committee. Each sponsorship level receives recognition in proportion to its contribution.

Gold

For the cure

€3.500

Full table (8 seats)
Prominent logo placement
across the sponsorship
proposal, event screens, social
media, and newsletter.
Mention during the live thank-
you speech.
Opportunity to include branded
material in the Goodie Bag.

SILVER

For innovation

€2.000

Half table (4 seats)
Logo featured in the event
programme, social media,
and newsletter.

BRONZE

For hope

€900

2 seats
Logo featured in the event
programme and on social
media.

Your visibility throughout the event

- Goodie Bag with branded material, given to all attendees
- La Nit de la Visió website
- Inclusion in the gala's printed materials
- Presence in the slideshow and on event screens throughout the evening
- Mention during the live thank-you speeches
- Social media exposure, reaching an active audience across Spain, Europe, and the United States
- Newsletter and regular communications sent to a database of more than 800 contacts

Would you like to join us in reaching our goal?

TAX BENEFITS

GraUnder Spanish Law 49/2002 on patronage and non-profit organisations (as amended on 1 January 2024), contributions to Fundació Síndrome d'Usher are eligible for a general tax deduction of 35%.

This deduction increases to 40% if, during the previous two tax years, the donor has contributed at least the same amount to the same organisation (recurring donor). The deduction is limited to 10% of the taxable base; any excess may be carried forward for the following 10 years.
